EDUCATION

BSCS

University of Lahore

CGPA: 3.88 / 4.0

Graduated: 2026

Intermediate (Pre-Eng)

ABICS Sargodha

Matriculation

ABICS Sargodha

TECHNICAL SKILLS

Languages

- Java
- Python
- JavaScript
- SQL

Frontend

- React.js
- HTML5 & CSS3
- Responsive UI/UX

Backend & Database

- Node.js
- PostgreSQL
- MongoDB

Data & BI

- Python (Pandas/NumPy)
- Power BI
- Excel (Advanced)
- Deep Learning / CNN

Tools

- Git & GitHub
- VS Code
- Figma

SOFT SKILLS

PROFESSIONAL SUMMARY

Results-driven Software Engineer with a Bachelor's in Computer Science (CGPA 3.88/4.0) from the University of Lahore. Specializing in full-stack web development, data analytics, and machine learning. With 2+ years of hands-on experience, I have delivered end-to-end solutions across frontend, backend, and AI domains. Passionate about building scalable, user-friendly applications that solve real-world problems. Open to remote opportunities worldwide and on-site roles in Pakistan.

EXPERIENCE & HIGHLIGHTS

- 2+ years of hands-on full-stack software development experience across frontend, backend, and ML domains.
- Built and deployed multiple production-ready web platforms, data dashboards, and AI-powered applications end-to-end.
- Proficient in modern React.js development with responsive UI/UX design principles and component-based architecture.
- Strong foundation in machine learning: image classification, regression models, and deep learning using Python.
- Experienced with Git/GitHub for version control, collaborative development, and CI/CD workflows.
- Proven ability to translate business requirements into technical solutions with clean, maintainable code.

PROJECTS

Lost & Found Platform [React.js](#) · [Node.js](#) · [MongoDB](#)

Full-featured web platform for reporting and searching lost/found items. Features an interactive UI, real-time user communication system, and a robust MongoDB-backed database. Demonstrates end-to-end full-stack engineering capabilities.

Business Analytics Dashboard [Power BI](#) · [Excel](#)

Built an interactive BI dashboard to visualize business KPIs, sales trends, and performance metrics through dynamic charts and automated reports. Enables data-driven decision-making for stakeholders.

Fake Currency Detection System [Python](#) · [Deep Learning](#) · [CNN](#) · [GUI](#)

Developed a Convolutional Neural Network (CNN)-based system to classify real vs. counterfeit currency notes using image processing techniques. Wrapped in a polished graphical user interface for ease of use.

House Price Prediction Model [Python](#) · [Scikit-learn](#) · [Regression](#)

Built a supervised machine learning model using regression algorithms and advanced feature engineering to predict house prices with high accuracy. Applied data preprocessing, cross-validation, and model optimization.

WHY HIRE ME?

I bring a rare combination of frontend creativity, backend logic, and data intelligence. I don't just write code — I build solutions. Whether it's a pixel-perfect React interface, a data pipeline, or an AI model, I deliver quality work on time. I am actively seeking remote roles internationally and local opportunities in Pakistan where I can contribute, grow, and make an impact.

- ▶ Problem Solving
- ▶ Team Collaboration
- ▶ Communication
- ▶ Adaptability
- ▶ Time Management
